PROJECTS

DevTracks
https://dev-track.now.sh
- Designed and built a Full-Stack resource tracking application to better organize a non-traditional software developer learning process.
- Utilized React, Node.js, SQL, PostreSQL and RESTful APIs to allow user to add, edit and delete all resources.

HealthyPlate
katiewrennhansen.github.io/healthyPlate
- Utilized Wikipedia, Edemam and NDB APIs to build application that allows a user to display background and nutritional information as well as recipes for a searched food item.
